

Daniel Chu

Software Engineer

dchu013@ucr.edu | 661-860-6090 | danny-chu.com | github.com/dann-y

EDUCATION

B.S. Bioengineering, University of California, Riverside

Fall 2016 - Spring 2020

PROJECTS

Full-Stack E-Commerce Website | *In Progress*

- Developed a full-stack e-commerce application with complete cart and checkout functionality, Paypal and credit card integration, admin and customer accounts, product reviews, and user authentication
- Built a responsive, mobile-first single page application using **React**, **React Router**, and **Bootstrap**
- Utilized **Node** and **Express** to fetch & serve product and user information from **MongoDB** database
- Integrated **Redux** to manage global state such as product details and items in a user's cart

Cryptocurrency Tracker Project | dann-y.github.io/crypto-viewer-react/

- Developed an application which displays data from 100+ cryptocurrencies via the CoinGecko **API**
- Implemented a mobile-first, single page design using **React**, **React Router** and **TailwindCSS**
- Created a watch list functionality using **Redux** state management and local storage

Personal Portfolio Project | danny-chu.com

- Developed a fast-loading one page portfolio website to document personal engineering work using **Gatsby.js**, **React**, **React Hooks**, **GraphQL**, **HTML**, **CSS**, and **Javascript**
- Designed and styled a responsive, mobile-first site layout using **Figma**, **Bootstrap**, and **Sass**

WORK EXPERIENCE

Undergraduate Researcher, B2K Lab at UC Riverside

April 2019 - June 2020

- Coordinated with UCR Bioengineering professors and a PhD student to develop a new technology aiming to innovate DNA synthesizing technologies
- Programmed 3D simulations of fluid-particle interactions within the DNA synthesis system, including custom functions using **C language**

Senior Design, UC Riverside

Fall 2019 - Spring 2020

- Collaborated with a team of four classmates to develop a novel instructive inhaler device fabricated using an Arduino microcontroller and various sensors encased in a custom-designed 3D-printed shell
- Programmed critical device functions such as data collection and aural/visual output using **C++**

UI/UX Design Consultant, Archived.co

August 2020 - November 2020

Website Redesign and Mobile Application Ideation

- Designed a modern, user-friendly, and responsive user interface for a prospective peer to peer online marketplace using **Adobe XD**

TECHNICAL SKILLS

Languages: HTML5, CSS3, Javascript (ES6+)

Frameworks: React.js, Sass, Bootstrap, TailwindCSS, jQuery, Express, Three.js

Tools/Technologies: Redux, Gatsby.js, Node.js, MongoDB, WebGL, Git / Github, Netlify

Design Software: Figma, Sketch, Adobe XD, Adobe Photoshop, Adobe Illustrator
